College Event Feedback System

- A web application designed to **gather insightful feedback** from students on college events.
- It provides intuitive dashboards for both **students** and **administrators**, real-time **sentiment analysis**, and structured **feedback management**

Existing Problems:-

- Manual feedback collection is time-consuming
- Low participation due to lengthy forms
- Difficulty in analyzing responses
- Lack of real-time insights

Project Overview

Purpose

Web application for student feedback on college events.

User Roles

Separate interfaces for Students and Administrators.

Technology Stack

Built with React, TypeScript, and TailwindCSS for modern design.

Key Objectives

Structured Feedback

Enable students to provide organized input.

Improve Event Quality

Support administration with data-driven insights.

Visualize Trends

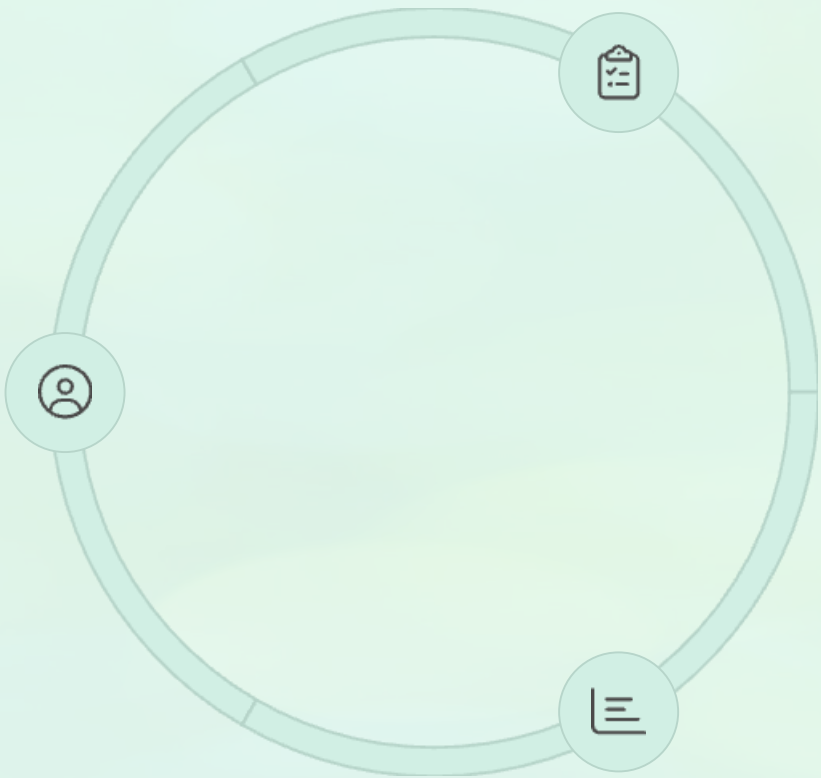

Show sentiment and participation over time.

Student Dashboard

Personal Welcome

Custom greeting with student's name.

Completed Events

List of events ready for feedback.

Recent Feedback

Quick view of latest sentiment tags.

Student Features

Submit Feedback

Quickly rate and comment on events.

Upcoming Events

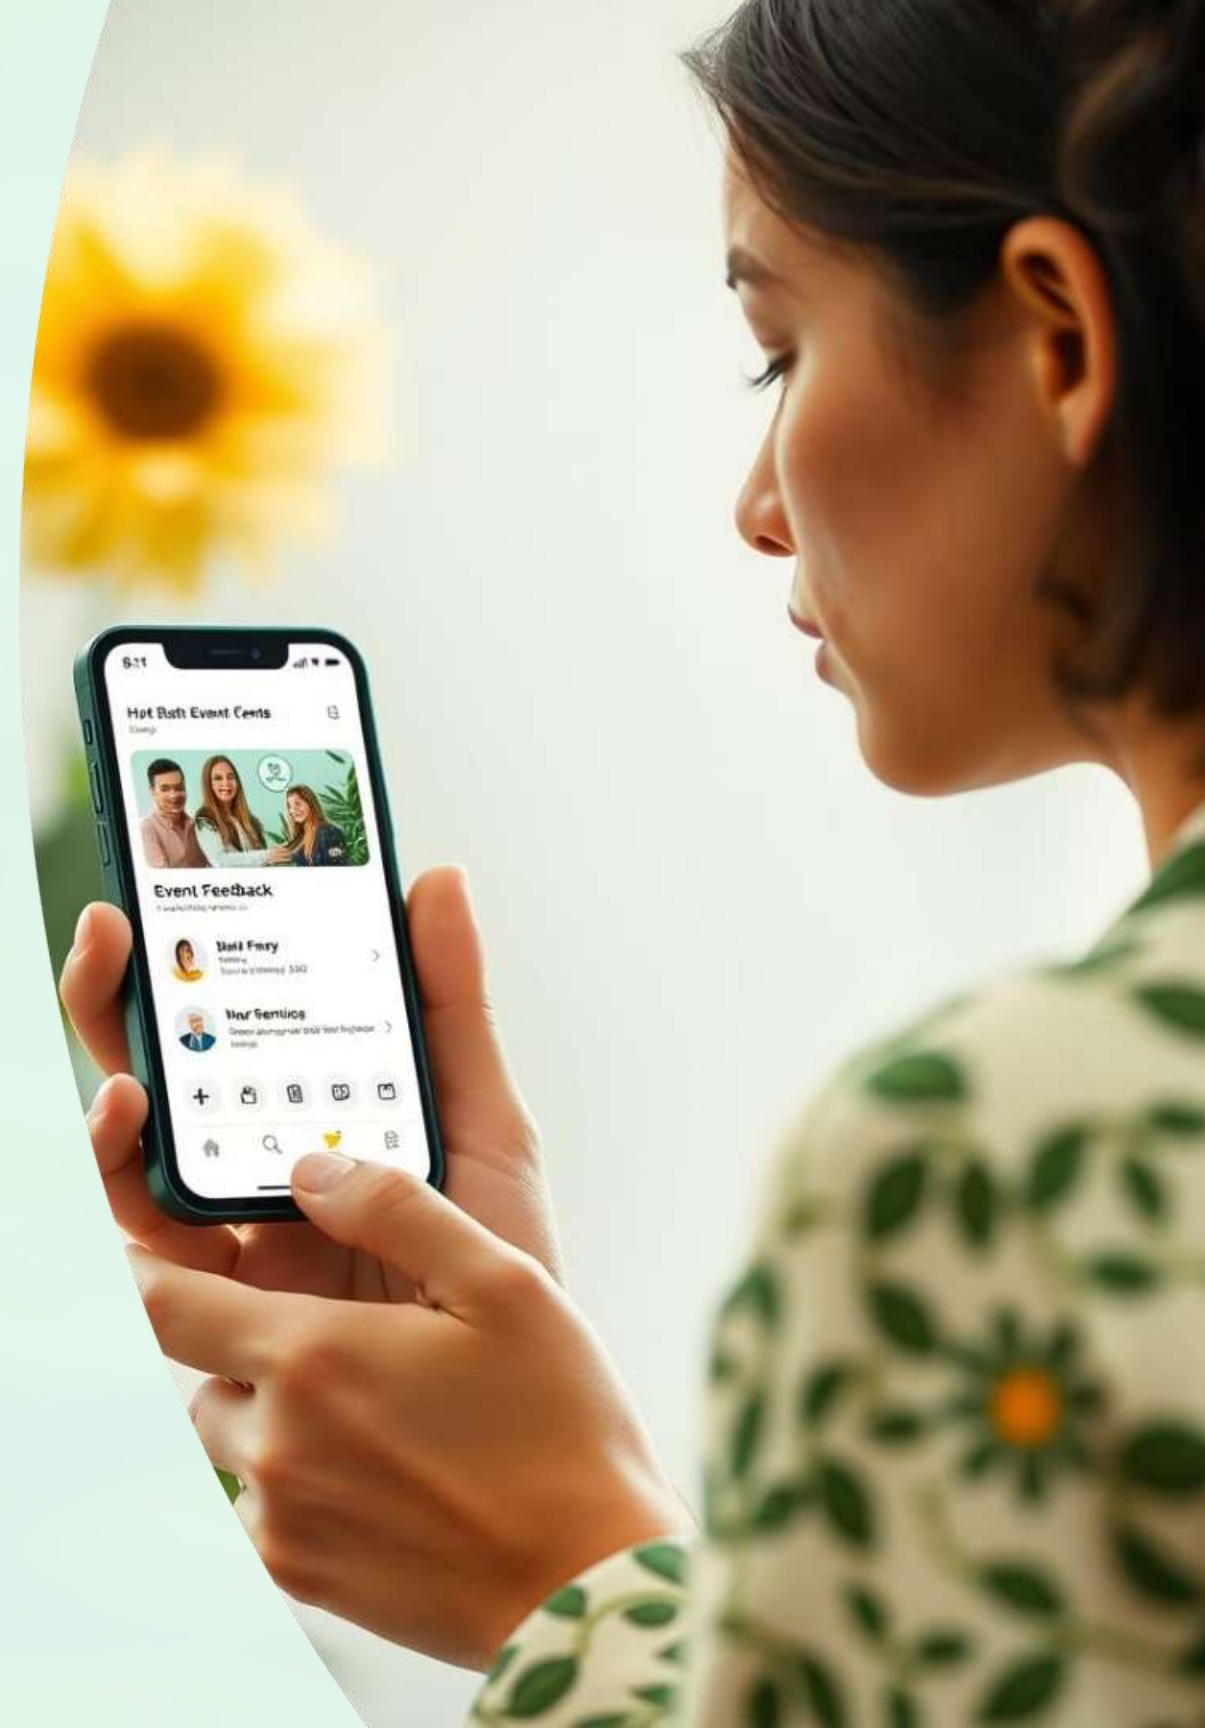

Browse and plan for future activities.

Feedback History

Review all past submissions.

Sentiment Insights

Understand personal feedback impact.

Administrator Features

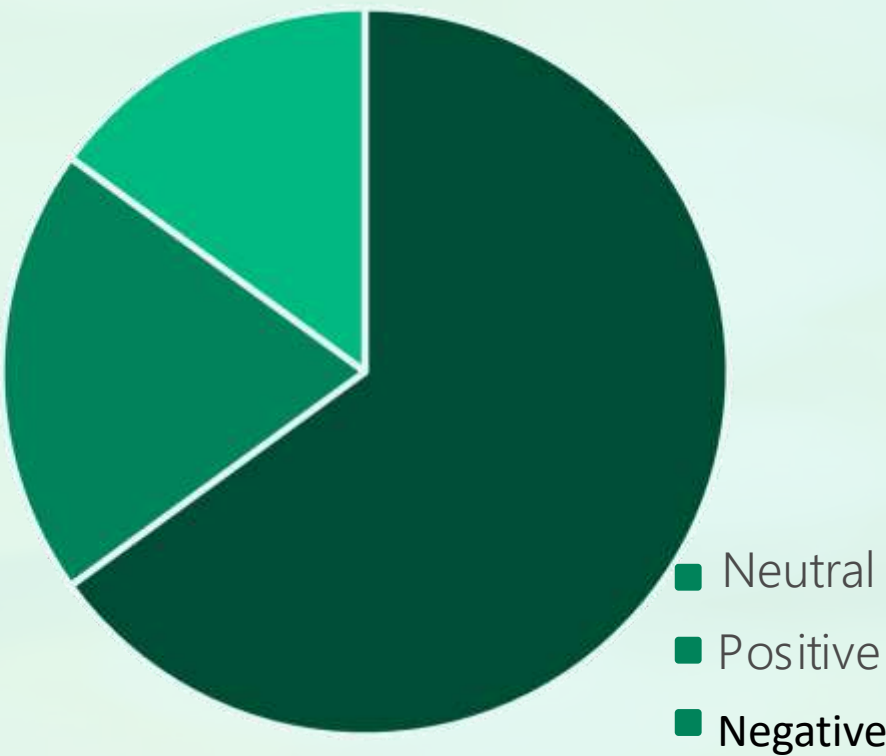

Access Feedback
Comprehensive view of all student submissions.

Sentiment Analysis
Track trends and statistics on feedback.

Manage Events
Oversee event data and details.

Feedback History

Chronological View

Feedback entries ordered by date.

Key Details

Ratings, comments, sentiment, and event info.

Searchable

Easily locate specific feedback entries.

Future Improvements

- Backend integration with real API.
- User authentication and JWT.
- Admin dashboard enhancements.
- Event management features.

Thank You!
